SUMMARY

Software Engineer with proficiency in Java, React.js, Node.js, and MongoDB. Experience designing REST APIs, working with version control and basic AWS services (EC2, S3). Familiar with AI technologies like OpenAI and actively contributing to open-source projects.

TECHNICAL SKILLS

Languages: Java, JavaScript, TypeScript, C, Python, HTML

Frameworks: React.js, Next.js, Node.js, ExpressJS, Tailwind CSS

Databases: PostgreSQL, MongoDB, MySQL

Tools & Cloud: Git, Docker, Postman, AWS (EC2, S3), Appwrite, Figma, Clerk

UI Libraries: Shadcn UI, Framer Motion

AI Tools: OpenAI API, Claude 3, LangChain

EDUCATION

JAIN (Deemed-to-be-University)

Bangalore, India

Bachelor of Engineering in Computer Science and Engineering | CGPA: 8.2/10

2022 – 2026

Relevant coursework: OOP, DBMS, Operating System, APIs, Data Structures and Algorithms

EXPERIENCE

Academic Project – Expense Tracker

Mar 2025 – Apr 2025

- Developed a full stack expense tracking app that allows users to securely manage and categorize their spending.
- Utilized React.js, Express.js, MongoDB, Node.js, and JWT authentication for a secure and responsive interface.
- Integrated features like chart visualization (Recharts), file upload (Multer), and real-time notifications (react-hot-toast) for enhanced user experience.
- Result: Improved personal finance monitoring; reduced manual expense tracking time by 40%.

Open Source Contributor - LeetCode Whisper Chrome Extension

Nov - 2024

- Contributed to the LeetCode Whisper Chrome Extension by YouTuber Pyush Garg, a tool planned to assist developers with coding.
- Designed the Pop-up UI of the extension, enhancing the user experience upon clicking the extension icon.
- Reviewed code and fixed 2+ UI/UX issues, making the extension 20% easier to use.
- Result: Pull request successfully merged, improving the overall interface and usability of the extension.

PROJECTS

AI Resume Analyzer

July 2025 – Present

- Developed a full-stack AI-powered resume analysis platform that provides real-time feedback and ATS score.
- Implemented resume upload, PDF-to-image conversion, and feedback generation using Claude 3 via Puter.js.
- Enabled analysis process, cutting resume review time by 50%.
- Result: Automated resume review experience that mimics recruiter analysis and improves job readiness.

Drive: File Management System

Dec 2024 – Jan 2025

- Built a Drive clone enabling file uploads, sharing, and intuitive folder navigation with a clean user experience (UX).
- Added OTP authentication and folder navigation, boosting file access security by 30%.
- Result: Delivered a seamless and efficient file management system with enhanced user experience and security.
